Re: Update for families of residents – visiting

Dear family member,

I wish to update you on the roll out of COVID 19 vaccination programme at Cheeverstown. To date 22 residents have been fully vaccinated and the remainder of residents have received their first vaccination with their second vaccination remaining on target for administration in May. This is a very welcome start.

You will be aware that revised visiting guidelines have issued from HPSC regarding visiting long term residential facilities where over 80% of residents are fully vaccinated. As Cheeverstown's vaccination programme is phased, only approximately one fifth of residents at Cheeverstown are fully vaccinated to date. Therefore, visiting guidelines are not being revised presently.

However, if level 5 restrictions ease following a government announcement (expected at the beginning of April), we hope to encourage outdoor scheduled visits in a safe environment similar to arrangements made under previous level 3 restrictions.

We appreciate that these restrictions are difficult for families but ask for your continued support to ensure the safety of all residents and staff.

Yours sincerely,

Denise Fahy
